

Version 25.0

Build	Modul	Description
01.01.25		RIBTEC Systeme GmbH has acquired the rights to FUNDA from RIB Software GmbH. This product will be further developed and customers will be supported with service.
30.01.25	General	FUNDA 25 is still installed in parallel with the RIB versions, but in a new path environment. User-specific settings, e.g. for paths or templates, must be made again. The editing of existing project files is possible with the products of RIBTEC Systeme GmbH without further restrictions.
30.01.25	Licensing	A licence from RIBTEC Systeme GmbH is required for the use of FUNDA 25 .
20.02.25	Design	The calculation of the 2nd core width has been improved for polygonal foundations . In some cases, the over pressured area was calculated too small, resulting in excessive utilisation.
28.02.25	General	The Czech language version for the graphical input and the results list has been added and an installation environment has been created for this purpose.
28.02.25	General	Information about the installed version and its build date can be displayed.
